DAWID URBAS

DEVELOPER

Results-driven developer with 9 years of experience specializing in decentralized technologies, AI, and mobile app development. Expert in creating decentralized applications using React, browser extensions using Svelte, and cross-platform mobile apps using Flutter and React Native. Proven track record of delivering innovative solutions with a strong focus on business value.

EXPERIENCE

DevRel Manager

STON.FI - TON'S LEADING DEX/AMM
2024 - 2025

- Built developer documentation (Quickstart guides, blog posts) and AI-powered video tutorials demonstrating automated SDK implementations.
- Collaborated with ecosystem partners (Privy) to publish integration guides in external documentation.
- Led live workshops and organized community hackathons to drive developer adoption on TON.

Chrome extension and electron desktop app developer

HOLOCHAIN
2023 - 2024

- Developed an Electron desktop app for a decentralized application store using Svelte and tRPC: Launcher Electron
- Created a browser extension for managing keys in decentralized applications using Svelte and Svelte-query: Holo Key Manager

Web3 developer

ADD3
2023

- Developed a React/Redux app for no-code Web3 product deployment
- Built a dapp for smart contract interaction

Flutter mobile developer

GETBOLD
2020-2022

- I led a Flutter app development agency, delivering a project management app with advanced features like a kanban board and BLoC architecture
- Managed a team of 2 developers to ensure high-quality results
- Developed and released a senior-focused mobile app with geolocation tracking, Firestore backend, video calls, and push notifications, deployed via Codemagic CI/CD

React Native & Flutter developer

NETGURU
2018-2020

- Collaborated with business development on estimations and expert calls
- Vetted React Native/Flutter candidates
- Developed apps with features like maps, chat, notifications, and animations across various industries

TECHNOLOGIES

- TS/JS (7+ years)
- React (5+ years)
- Svelte (1+ year)
- React Native (3+ years)
- Flutter (4+ years)
- Web3 (3 years)
- Expo (1+ year)
- CI/CD
- Git
- Next.js
- Basic Rust
- Basic Python
- Basic Node

EDUCATION

Master Degree in Computer Science

UNIVERSITY OF ECONOMICS IN KATOWICE
2016-2018

Bachelor Degree in Civil Engineering

SILESIAN UNIVERSITY OF TECHNOLOGY
2011-2016

OTHER

hack4law hackathon

2023
Secured second place with a POC desktop app using Whisper AI model and Facebook/nllb-200-distilled-600M for live translation of court cases, including the possibility of manual sentence correction by certified translators in real time. Implemented in Python with local models for security.

Co-founder and Community Manager

CLANHOUSE
2021

- Managed and extended the ClanHouse community, assigning members to projects
- Connected aspiring software engineers with companies by running internal projects to evaluate skills and assess communication
- Bridged the gap between high demand for engineers and individuals seeking experience, recommended top performers to companies for a fee
